

Expt 4 - FysNode library

Goals

- package all current functionality into an arduino library
- achieve modular configuration support

Files

flamegun_node.ino
dht11_node.ino
dht22_node.ino
control_node.ino

|| controller script is the same as the last time
|| refers to the fyosk repo

Behaviour

- Replicate Expt 3 behaviour
- use macros/conditional variables to configure the firmware to behave accordingly to the hardware setup.
